

Sea-R.O., Inc. Watermakers "Cascade" Marine Drinking Water Filtration Systems

Introducing a true "Yacht Quality" filtration system that will greatly improve the taste, purity, health and safety of the stored water in a boats water tank.

Until now, there has not been an affordable option in water filtration specifically built for the use on private boats and yachts. "Cascade" filtration systems are constructed of the highest quality components available and provide the unique filtration needs to improve the palatability and safety of stored water.

Easy to install, all the needed hardware and plumbing are included.

Marine white housings are made of FDA approved materials and are pressure rated to 125ps. With a positive o-ring seal.

Dual filtration removes tastes, odors, chlorine and organic chemicals.

Industry standard size cartridges are available worldwide and are inexpensive and easy to change

Includes: Solid stainless steel bracket, Filter housings, filter cartridges, all fittings including an adapter to tap into your boats system, tubing, chrome touch flow faucet, and complete installation instructions.

See back for details and dimensions.

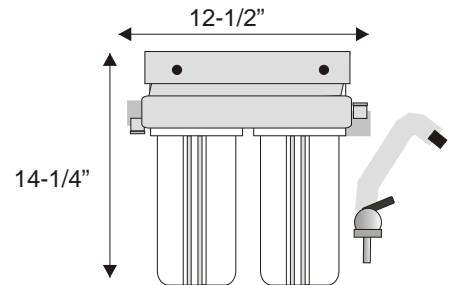

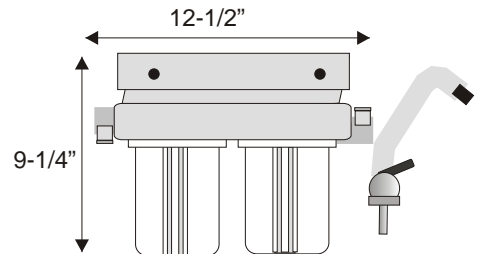

“Cascade” filtration systems are available in two models. Choose from the “Ultra” or our compact sized “Mini” system.

Both feature a rugged solid stainless steel mounting bracket FDA approved pure polypropylene housings that are rated at 125 psi. Installation is commonly done under the galley sink and we provide an in line adapter valve to tap into your boats existing cold water line. Simply attach the included tubing to this adapter, attach tubing to the filter with the included instant seal fitting (no tools required) and then attach the filter outlet fitting to the included faucet. You will notice the taste difference immediately.

The “Ultra” uses standard 2-3/4” x 9-3/4” filter housings and include filter cartridges to remove Taste, odor, color, chlorine, organic chemicals, sediments, plus 99.99% removal of E.coli and meets NSF standards for cyst reduction including Cryptosporidium and Giardia.0.5 micron rated final “Ceramikx” cartridge provides the ultimate in filtration and replacements are reasonably priced.

The “Mini” uses standard 2-3/4” x 4-3/4” filter housings and include filter cartridges to remove Taste, odor, color, chlorine, organic chemicals, sediments, plus 99.98% reduction of cysts including Cryptosporidium and Giardia.1.0 micron rated final “PB1” cartridge also provides 90% reduction of any lead present and meets NSF standards for turbidity reduction.

Faucets measure 6-1/2” from back of base to tip of spout horizontally and 8” vertically. Spout swivels 360 degrees. Press down on tab for momentary flow and lift to stay on. In line valve is included to allow filter servicing without depressurizing entire boat water system.

Replcement filter cartridges

For “Ultra”

| Filter | Size | Function | Part # | Price each |
|-----------|--------------|--|--------|------------|
| Prefilter | 2.75 x 9.75” | 10 micron taste/odor Dechlorination | CFCTO | \$12.00 |
| Final | 2.75 x 9.75” | 0.5 micron Ceramikx Cyst removal | CFCER | \$19.00 |

For “Mini”

| Filter | Size | Function | Part # | Price each |
|-----------|---------------|---|--------|------------|
| Prefilter | 2.75” x 4.75” | Sediment removal To 5 micron | CFM05 | \$4.25 |
| Final | 2.75” x 4.75” | Sediment to 1 micron Chlorine and Lead Reduction, cysts | CFPB1 | 15.75 |
