PURA Water Treatment Systems

Advanced Ultraviolet Water Treatment Systems provide supplemental filtration and disinfection of stored water to provide clean, clear, great tasting potable water. Three stage treatment removes any sediments down to 5 microns, then carbon filter removes unwanted taste and odor and residual chlorine if present, then Ultraviolet Sterilizer Chamber destroys any organisms present. Simply plumb in to pressurized water pipe and plug into standard 115VAC wall socket. Three sizes to choose from. All models feature Electronic Lamp Indicator LED, Complete set of filters, Filter Wrench and instruction manual.

UVB Series

Designed to be installed at a single point of use, typically under a kitchen sink with a dedicated drinking water spigot. Flow rate is 2 gpm and has a single 14 watt ultraviolet lamp. 3/8" FNPT inlet/outlet. 15" H x 16" W x 5.5" D.

Order #	Description	Price
15630131	3 sump system, 5 mic sediment, Gran. Carbon, UV with .5 mic carbon block	\$615.25
33003051	5 micron prefilter for sump #1	\$7.30
33004024	5 micron Granular Carbon filter for sump #2	\$41.72
33004030	.5 micron Carbon Block filter for sump #3	\$38.21
36002017	Replacement UV lamp #11 for sump #3	\$79.01
92508	Filter tank wrench	\$4.16
34202035	O-Ring for sump	\$5.24
